

COMPANY CAPABILITY STATEMENT

Next-generation technology. Enterprise-scale compute.

NexTec Group specializes in enterprise GPU sourcing, configurable AI infrastructure, and long-term customer relationships. We scope complete systems from the accelerator and host platform through storage, networking, cooling, and deployment.

Accelerators	RTX PRO 6000 Blackwell Server, Workstation and Max-Q; RTX PRO 5000 48/72 GB; RTX PRO 4500, 4000, SFF and 2000; H200 HGX/NVL; L40S, L4; and specified lifecycle GPU replacements.
Complete systems	8-GPU RTX PRO 6000 Server Edition configuration; H200 HGX and PCIe NVL systems; custom AI/HPC servers and workstation infrastructure.
Integration	CPU and ECC memory selection, enterprise NVMe, high-speed networking, rack integration, validation, burn-in, deployment support and replacement hardware - according to the accepted scope.

Enterprise procurement

Volume orders, repeat purchases, supplier onboarding, forecast-based capacity planning, phased deliveries, inventory reservation proposals and long-term supply agreements. Exact BOM, accepted substitutions, condition, warranty eligibility and delivery commitments are documented per agreement.

Markets served

Data centers, AI companies, cloud GPU providers, enterprise infrastructure teams, engineering firms, research organizations, universities and mission-critical contractors.

Commercial engagement

Define the workload and facility requirements. Develop the supported configuration. Agree on acceptance testing, delivery and lifecycle responsibilities. Maintain a consistent hardware baseline for repeat procurement.
